ACM had organized a Workshop on Video Editing on 02nd Aug 2019. This Workshop was organized to help develop a Video editing Skills. Video editing is important because it is the key to blending images and sounds to make us feel connected with the film. This workshop will be a colossal opportunity for student editors. This workshop was conducted on Adobe Premiere Pro. Adobe Premiere Pro is a powerful, customizable and nonlinear editing software.

The Workshop was conducted by Mr. Calvin Castro. First, the workshop started with an introduction to Premiere Pro. After that the basics of Video Editing such as cutting a video, dragging, laser tool and speed of duration was done. Second, the operation of audio and video together was taught. Then a small animated video was made by the students. Lastly, Mr. Calvin taught how to export the video and save it.

The students learned a lot in this workshop such as about how to use green screen and change the background of a video and make the video sci-fi. In total 16 students attended this workshop.
