

From the Editor's Desk

"The ultimate measure of a man is not where he stands in moments of comfort and convenience, but where he stands at times of challenge and controversy."

-Martin Luther King, Jr.

Greetings from the Department of Computer Engineering, DBIT.

The current situation of COVID has truly made us understand the meaning of the wonderful quote stated by Martin Luther King, Jr.

Few months before when everyone was struggling to blend with the "new-normal" behavior, in the present scenario each one of us has accustomed with it very well and also learnt to live with it without many complaints.

Amidst all this, the department feels proud and exuberant to acclaim that we are ready with all new hopes and hues to bring out the 6th issue of our biannual newsletter, which is going to surely unfold the precious moments and achievements of the department.

Finishing the last semester was a bumpy ride, when nobody had any idea about how the things will go ahead, everybody still managed to put up a good show by conducting various webinars, events and activities.

Faculties and students have published their research papers in eminent journals and conferences to continue the research publication legacy of the department.

Considering the time everyone had in their hand, it was used efficiently to complete various certification programs on different MOOC platforms which will surely help the department to excel.

Faculties have also attended various Faculty Development Programs and arranged multiple webinars online taking into consideration the need of the hour topics.

Department is working equally hard towards their SEAD journey, NAAC and NBA accreditation.

The department's placements records talk a lot about the efforts the students take towards their studies and holistic development with the faculties' guidance and timely support.

I hope you enjoy reading this newsletter, and I look forward to hearing from you.

Hoping you find this newsletter edifying and useful. If you ever have any suggestions or comments, you can mail me at deepali.dbit@dbclmumbai.org.

I appreciate the hard and persistent efforts put up by the student committee, Alumni and the faculty in bringing this newsletter in time.

I express my deep sense of gratitude to the Newsletter team Mr. Hariharan Iyer, Ms. Briana Rajan, Ms. Riona Dsouza and Ms. Sonal Chaudhari.

I thank the head of the department Ms. Sana Shaikh and all the faculty members of the department for their inputs to this newsletter.

With best wishes,
Ms. Deepali Kayande

From the HOD's Desk

With great pleasure I introduce you to the Department of Computer Engineering, DBIT. Computer Engineering is a versatile, dynamic and evergreen branch of engineering. The major strength of the department is a team of well qualified and dedicated faculties who are continuously supporting the students for their academic excellence. The students and faculties of the department are always proactive in taking initiatives in technical, cultural and social events. I hope that this newsletter will serve the purpose of reflecting all activities of the department and it will inspire others to do their best.

The Department has recorded consistent improvement in its academic, research and placement performance. We offer a range of innovatively designed value added courses and certification courses whose curricula are constantly updated to meet the changing requirement of the industry. We believe that our students have been well accepted in their job profiles and have consistently exceeded expectations of the corporate world. The students are always encouraged to get hands-on experience in the corporate world through internship projects. In their curriculum, they are encouraged to take up mini projects to supplement theoretical knowledge with practical experience.

Our students are not only academically sound and disciplined but they also showcase their talents under non-technical, technical and cultural forums. We also encourage students to organize events such as Tecknack, Coding competitions, workshops on latest tools and technologies, participating in various events organized by other colleges and also get involved in activities of social relevance.

We are encouraged to see many industries coming back to our department, which reinforces our belief in the effectiveness of our curriculum and its suitability to meet the dynamic corporate world.

I would like to thank all my colleagues for their tireless efforts to help the department progress at a very steady pace. I also would like to thank the Editorial team for designing this newsletter. With this brief introduction, I invite you to go through this newsletter which highlights the achievements of the department, and despite of COVID19, we have showcased the best. Looking forward to having many more future editions.

With best wishes,
Ms. Sana Shaikh

 Soft Skills for
 Jobs of 21st Century

VENUE: Fr. Santino Mondini Hall, DBIT

A two day event –‘TCS – DBIT Techvibes’ was organised by Prof. Sejal Chopra on 8th Jan 2020 and 9th Jan 2020 in collaboration TCS by the professionals from TCS. The event threw light on almost all the skills an engineering student needs navigating through the entire spectrum of skillset from tech skills to soft skills. The big shots of the computer world – artificial intelligence, cloud computing, blockchain and big data and analytics were skimmed through. With the session being delivered by experienced persons from the industry, the event succeeded in providing all the participants a taste of the industry and guiding them as to what areas of development is needed as per the requirement of the industry.

KAP (Kernel, Arduino & Python) Mashup

On 29th Jan, 2020 a peer learning session was conducted for the students in the second year by few students from the third year under the guidance of Prof. Sejal Chopra, Prof Sana Shaikh and Prof. Shainila Mulla. The workshop intended on providing the participants with the knowledge to rock on their mini project with a real-time usable model with the integration of kernel, Arduino and python. At the end of the workshop, the participants were asked to present an idea of a model involving all these technologies.

Interactive Learning through Google Forms

On 18th February, 2020 a session was arranged for the School and ITI Faculties from Institutes across Maharashtra (Teaching Vocational Subjects) by the department of Computer Engineering. The facilitators for the day were Ms. Sana Shaikh, Ms. Sejal Chopra and Ms. Shafaque Syed. The session was a grand success in achieving its aim to provide the insights to provide the attendees as to enhance college branding and visibility in other schools by providing interactive learning opportunities to students by creating quizzes, taking up surveys and data analysis and accepting feedback and responses.

SEMICODE

Semi code was a Coding Competition held by ACM student chapter in collaboration with 5 colleges of Mumbai - ACM DBIT, ACM SNTD, ACM SAKEC, ACM MPSTME and ACM MHSSCOE. The first round for ACM DBIT was held on 4th February, 2020 at Computer Center, Dbit and 44 teams participated out of which 21 teams were selected for the next round. The second and the final rounds were held at Mukesh Patel college of engineering on 23rd February, 2020. Team consisting of Mr. Shubham Bhist and Mr. Sachin Sharma from DBIT won the final round securing 3rd place.

Project Based Learning in Vocational

A session was conducted on 27th February, 2020 by Ms. Shafaque Syed of Computer Department and a team from Tech Shiksha Labs, Vashi for School and ITI Faculties from Institutes across Maharashtra (Teaching Vocational Subjects) with the motive to incorporate active learning in schools while teaching vocational courses. The session helped the attendees gain the ability to make understand concepts through making small projects and via activities.

How to use Selenium to automate any daily online task

An expert session was organized for students of second year, Computer Engineering to throw light on some information about Selenium, a tool used for automation. The session was a part of the OST Lab Course and was organized under the guidance of Ms. Sana Shaikh. The facilitator for the day was Ms. Priya Kaul. The session hoisted the success flag in accomplishing its aim in empowering students with the knowledge to convert their ideas into reality to automate various tasks.

TEKNACK 2020

An act once done becomes a memory...But an action consciously done again and again makes an habit that upskills one's soul to being a better human. And one of the best ways to carve some good ideas into minds, especially of the young is through a game and keeping this in mind, Teknack has produced some value-enhancing games that give the player a chill down the spine.

Powering through the obstacles. By seeing the positive in everything and providing the games, created by our developers to the world Teknack 2020 was conducted online for the very first time due to the covid -19 pandemic. Developers made and published 16 amazing games amidst the lockdown due to the pandemic.

WEBINARS

Gain Momentum... Unlock your Potential...

The onset of Covid-19 pandemic made the world go round. Everything from industry to education took a deep turn in both, the way it was perceived and conducted. But that did not stop the Department of Computer engineering to break apart the quest of knowledge. A series of webinars under the aim to gain momentum to make ones place in the industry and to unlock ones potential to rise up as wonderful engineers for this world took quarantining to a whole new level as an opportunity to grow and acquire more wisdom.

Panel Discussion on “Life Post Covid” with different stakeholders on one common platform

A Panel Discussion on
LIFE POST COVID

				
Mr. Ravish Sahay CEO Sequelstring (Industry Expert)	Ms. Sharon Pires Secretary LPG HR- BPCL (Parent Rep.)	Mr. Dion George Software Developer Cuemath (Alumnus)	Mr. Aarish Iyer Pursuing MS in CS Dartmouth College (Alumnus)	Ms. Sasha Pais Ex-Vice Chairperson ACM TE - Comp (Student Rep.)

Date: 14 June 2020

Computer Department of Don Bosco Institute of Technology organized a Panel Discussion on 14 June 2020 on topic “Life Post Covid” under Webinar Series called “Gain Momentum: Unlock your potential”.

Panel discussion was systematically divided in 3 sections like Impact on Jobs, Lifestyle Shift and Utilizing time during lockdown. The objective of the discussion was to build awareness about the personal and professional challenges that every individual is subjected to face post covid. This discussion was relevant to everyone . Q & A was also conducted after the end of the third section. Overall it was very informative and cleared doubts of many participants who attended this discussion panel.

WEBINARS

Fighting financial crimes

A webinar on Fighting Financial Crimes was conducted on 17th June 2020. This was conducted on WebEx. The resource person for this webinar was Mr. Mustafa Fatakawala. The objective for this webinar was to address the various crimes in financial sector of the Industry and its challenges. The webinar focused on various financial crimes faced by financial institutions with some examples elaborating the issue.

DON BOSCO INSTITUTE OF TECHNOLOGY, MUMBAI

In the wake of making students familiar with the future demands in the field of software career, a webinar was conducted by Mr. Shirish Sawant on 17th June, 2020 on zoom video conference and was also streamed live on youtube. The webinar focused on digital transformation journey and the increasing demand of various software career options. A positive feedback was received from the participants who found this webinar provoking and engaging. They were able to grasp information about digital transformation.

WEBINARS

Mobile Forensics: Opportunities and Challenges

A webinar on Mobile Forensics: Opportunities and Challenges was conducted on 20th June 2020 for the students and the faculty. The resource person for this webinar was Dr. Rizwan Ahmed. The webinar was conducted over Zoom and also streamed on YouTube. The objective of this webinar was to introduce the field of Mobile forensics to the audience. The webinar focused on various financial crimes faced by financial institutions with some examples elaborating the issue.

WEBINARS

Digital Agriculture with AI and Image Processing

The poster is for a webinar titled "DIGITAL AGRICULTURE With AI And Image Processing". It is presented by the Department of Computer Engineering and ACM Student Chapter at Don Bosco Institute of Technology, Mumbai. The speaker is Dr. Leisa Armstrong, a Senior Faculty Member at Edith Cowan University, Perth, Australia, and President of the Australia Society of ICT in Agriculture. The event is scheduled for Sunday, 21st June 2020, from 10:00 am to 11:00 am IST. Faculty coordinators are Ms. Deepali K. (9970284471) and Ms. Mayura G. (9769971671). The poster features a background image of a drone flying over a field, a small inset image of a plant with glowing spots, and a portrait of Dr. Leisa Armstrong. Logos for Don Bosco Institute of Technology and ACM are also present.

<https://www.linkedin.com/in/leisa-armstrong-165341b/>

Webinar on Digital Agriculture with AI and Image Processing was conducted by Dr. Leisa Armstrong on 21th June, 2020 via zoom video conference. In the webinar, Dr. Leisa Armstrong spoke about Digital Agriculture followed by the challenges farmers in India face as of present day. The speaker also spoke about the Issues in implementing Digital Agriculture along with smart digital agriculture. Dr. Leisa Armstrong talked about various research areas available in this field and inspired the students to go for research in this field.

WEBINARS

Language Acquisition with AI Agents in Immersive Environments

A webinar on 'Language Acquisition with AI Agents in Immersive Environments' was conducted on 18th June, 2020 by Department of Computer Engineering, DBIT and ACM-DBIT. The facilitator for the session was Dr. Rahul Divekar, researcher at Rensselaer University, USA. The session helped the participants to understand the Engagement with a real-world environment with the help of AI agents using language acquisition in immersive environments. The facilitator gave us a glimpse of his project to build interpersonal conversation skills using AI through immersion-learning Chinese as a language to help users learn and communicate in that language. The project-driven approach for explaining to the participants language acquisition gained a big fat upvote in meeting its goals.

WEBINARS

Boosting Employability Post Covid

The poster is for a webinar titled "Boosting Employability Post COVID". It features a green header with the text "DON BOSCO INSTITUTE OF TECHNOLOGY, MUMBAI" and "DEPARTMENT OF COMPUTER ENGINEERING AND ACM STUDENT CHAPTER PRESENTS WEBINAR ON". The ACM logo is in the top right. The main title "Boosting Employability Post COVID" is in a dark grey band. Below is a colorful illustration of a city with business icons and a man in a suit. A black box in the bottom right contains the speaker's name and details: "Mr. REYNER DSOUZA", "Digital Business Integration Consultant at Accenture, Toronto", and "Solution Specialist, Senior Software Engineer, Big Data Consultant and Manager of Data Analytics". A small photo of Mr. Dsouza is in the bottom left corner.

With the covid-19 pandemic hitting all around the globe in the most unexpected way and the situation changing before the blink of an eye, the industry too was shaken in a way no one dreamt of in the wildest of their dreams. So to give an upperhand to all the Dbians, a session by Mr. Rayner Dsouza on 'Boosting Employability Post Covid' was conducted on 21st June, 2020. The session proved to be a grand success in providing the participants with an overview of what they should work on to have a promising future in the industry.

WEBINARS

Lean Product Development Using Design Thinking

A webinar on Lean Product Development with Design Thinking was conducted on 30th June, 2020. This webinar was conducted by the ACM Student Chapter & Computer Department of Engineering, DBIT. The resource person for this webinar was Dr. Amiya Kumar Tripathy and faculty co-ordinator Ms. Shafaque Syed. A total of 520 participants joined in this event, out of which 85 joined via the Zoom call and the others streamed it on YouTube. The objective of this webinar was to highlight how lean approach can be implemented in product development along with design thinking.

A Roadmap to B.E. Final Year Project: From Introduction to Conclusion

The ACM Student Chapter & Computer Department of Engineering, DBIT conducted a webinar on A Roadmap to B.E. Final Year Project: From Introduction to Conclusion on 1st July, 2020. This webinar was conducted on Zoom and also streamed on YouTube. A total of 205 people participated in this webinar out of which 79 joined on Zoom and the others streamed it on YouTube. The resource person for this webinar was Dr. Shaikh Phiroj and faculty co-ordinator Ms. Shafaque Syed. The objective of this webinar was to give guidance to the Final Year Students on the flow of the BE Project work right from topic selection to conclusion.

WEBINARS

Leverage the intelligence of Cloud Computing

The poster is for a webinar titled "Leverage the Intelligence of Cloud Computing". It is organized by the Department of Computer Engineering and ACM Student Chapter at Don Bosco Institute of Technology, Mumbai. The speaker is Mr. Gaurav Dharasania, Founder of CollabAce Innovative Labs Pvt. Ltd. The poster includes a list of his qualifications and a photo of him. The date and time of the webinar are 6th July 2020, from 11 am to 12 pm. Contact details for Ms. Shainila Mulla are provided at the bottom.

- Currently working on "Project Phoenix"

Date: 6th July 2020
Time: 11 am - 12 pm

Contact Details: Ms. Shainila Mulla - +919820739424

For cloud computing enthusiasts, a webinar was conducted by Mr. Gaurav Dharasania on 6th July, 2020 via zoom video conference. It was organized by Computer Department of Engineering, Don Bosco Institute Of Technology with the guidance of Prof. Shainila Mulla. Cloud Computing is changing the Business World. Companies are rapidly incorporating cloud technology because of its key benefits like cost efficiency, scalability, data security, mobility. The session focused on this positive impact of cloud computing on business and society.

Harshada Daund	Third Year	Aditya Birla	6th December to 6th January 2020

SOCIAL MEDIA AND COVID

Covid – 19 pandemic hit us humans in all streams in the wildest of ways none of us could ever imagine. When social distancing came into picture to set us all apart, social media stepped in to bridge the gap. Technology – especially computer technologies in spectrum spreading from the east to the west was welcomed in all its glory and the world was in a quest for more.

The COVID-19 pandemic has mobilized the world's scientific community like no other recent crisis, including many researchers using the most modern data science and artificial intelligence approaches. At the University of Chicago, public health experts, computer scientists, economists and policy analysts have launched projects using computational tools to better detect, diagnose, treat and prevent the spread of the deadly virus.

The summer of 2020, three of these projects received seed funding from the C3.ai Digital Transformation Institute (DTI), a new partnership of technology companies and universities committed to accelerating the benefits of artificial intelligence for business, government and society. The research attacks the pandemic from several angles: helping policymakers control disease spread by identifying and addressing key social factors, physicians detect the disease at earlier stages, and hospitals decide which patients require admission.

The onset of Covid has definitely made us realize the importance and the value of our stream – Computers more than ever. In this world that is thirsting for more such technologies to bridge up human bonds in all forms – from emotional to physical there is a lot more under the iceberg we have touched to explore and excavate and the joy of this exploration is waiting with wide open arms to embrace us welcome to this bliss. With lockdown and the pandemic setting us- a generation known to be engrossed with social media bonds more than real-life bonds further apart as we have reached a state with no human contact from less human contact, we surely have learnt the value to true

But have we worked in to fill up the gaps in our bonds with fellow humans around us? The rise in the number of suicide cases and sufferers of depression have clearly shown us that there are many who are suffering and are left apart. The least we- the social media enthusiasts can do is care for them with a few texts at least. With times like these when technology is booming as never before, why not we make a move to boom as an individual, as a human... If not save a life on this earth, we definitely can bring a smile on this earth!!!
