Objective : To highlight the software career options in near future and the process of using digital technologies to solve problems.

Outcomes : To determine proper insights into digital transformation with respect to the current scenario and the opportunities in software career.

Excerpt : The main objective of this session is to realise that yesterday's skills aren't enough to survive digital transformation and the impact of the demand for niche skills like Performance, Security and API testing on job markets.
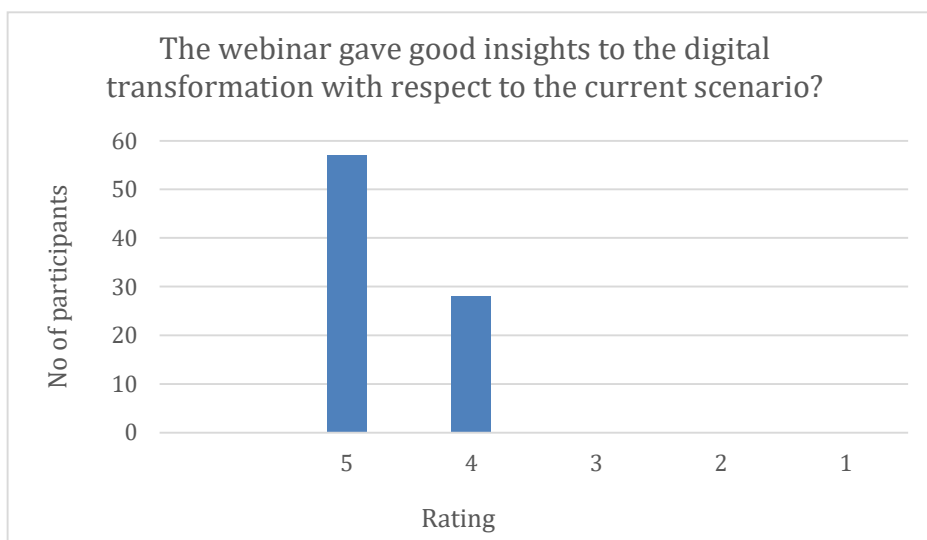

Report :

With the purpose of optimizing processes and making workflows faster, easier, and more efficient new and frequently changing digital technologies are now used to create new or modify existing business processes, culture, and customer experiences to meet changing business and market requirements. The webinar focused on this digital transformation journey and the increasing demand of various software career options.
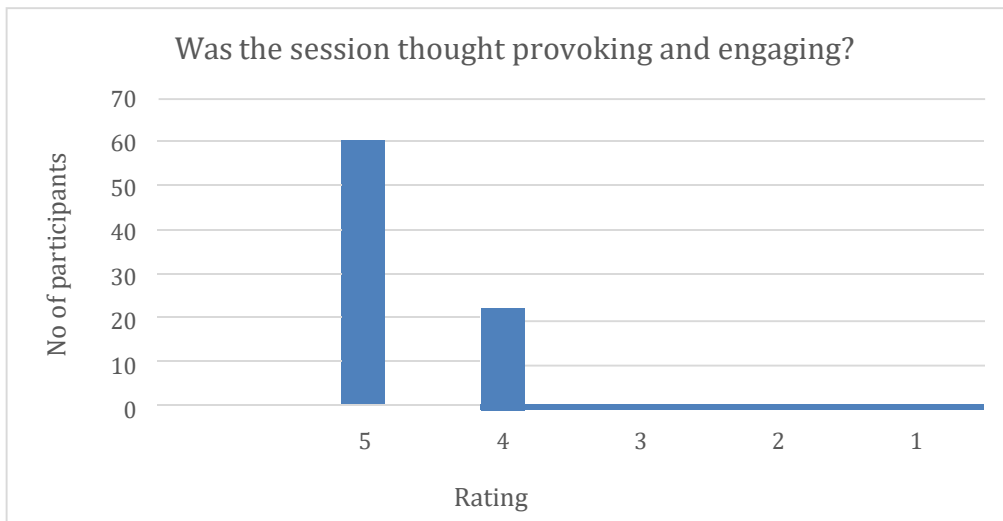

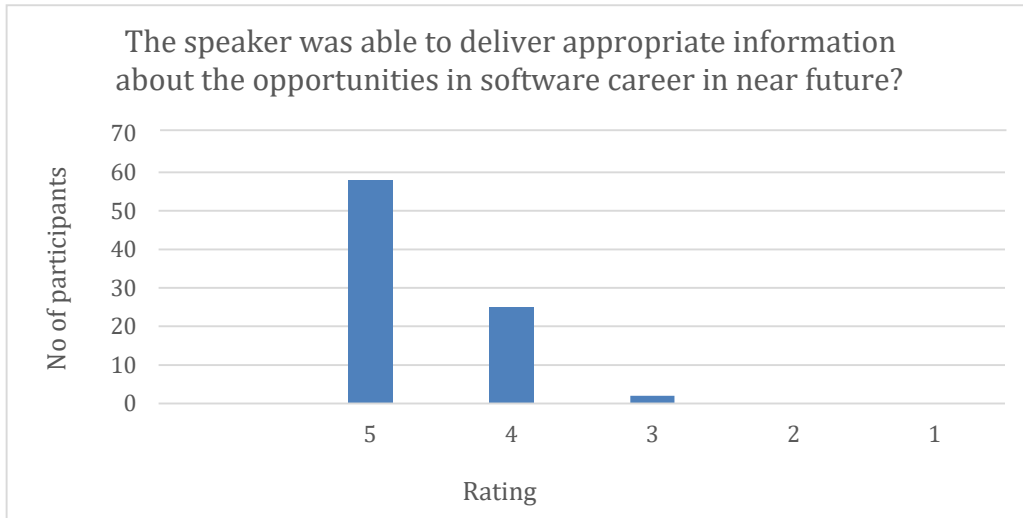

The webinar was organized by the Computer Department of Engineering, Don Bosco Institute Of Technology in the wake of making students familiar with the future demands with respect to the current scenario. It was held on 17th June,2020 from 11:00 am to 12:pm on zoom video conference and was also streamed live on youtube.

To enlighten us through this topic we had Mr. Shirish Sawant as our speaker who is a senior technology leader , Independent Consultant and Former Head of Testing Practise at Majesco MCS Offshore .He has rich experience in banking and insurance domains. His 25+ years of experience in IT industry served us with relevant information. The webinar was concluded successfully with the speaker answering all our queries.

Feedback Analysis:

A positive feedback was received from the participants as majority of them found the webinar provoking and engaging and were able to grasp information about digital transformation.
